#### Approval of annual financial statements

I am responsible for the preparation of these annual financial statements, which are set out on pages 5 to 46, in terms of Section 126(1) of the Municipal Finance Management Act and which I have signed on behalf of the Municipality. I certify that the salaries, allowances and benefits of Councillors, are within the upper limits of the framework envisaged in Section 219 of the Constitution, read with the Remuneration of Public Officer Bearers Act and the Minister of Provincial and Local Government's determination in accordance with this Act.

## 1. BASIS OF PRESENTATION

The Annual Financial Statements have been prepared on an accrual basis of accounting and are in accordance with the historical cost convention.

The Annual Financial Statements have been prepared in accordance with South African Standards of Generally Recognised Accounting Practice as prescribed by the Minister of Finance in terms of Government Gazette number 31021, Notice Number 516, dated 9 May 2008 and also in terms of the standards and principles contained in Directives 3 and 5 issued by the Accounting Standards Board ("ASB") in February 2011.

## 1.1 Changes in accounting policy and comparability

Accounting Policies have been consistently applied, except where otherwise indicated below:

For the years ended 30 June 2011 and 30 June 2012 the municipality has adopted the accounting framework as set out in point 1 above. The details of any resulting changes in accounting policy and comparative restatements are set out below.

The municipality changes an accounting policy only if the change:

- a) is required by a Standard of GRAP; or
- b) results in the financial statements providing reliable and more relevant information about the effects of transactions, other events or conditions on the performance or cash flow.

#### 1.2 Critical judgments, estimations and assumptions

The following are the critical judgments, apart from those involving estimations, that management has made in the process of applying the municipality's accounting policies and that have the most significant effect on the amounts recognised in the Annual Financial Statements:

## 1.2.1 Revenue Recognition

Accounting Policy 8.2 on *Revenue from Exchange Transactions* and Accounting Policy 8.3 on *Revenue from Non-exchange Transactions* describes the conditions under which revenue will be recorded by the management of the municipality.

In making their judgment, the management considered the detailed criteria for the recognition of revenue as set out in GRAP 9: *Revenue from Exchange Transactions* and GAMAP 9: Revenue, as far as Revenue from Non-Exchange Transactions is concerned (see Basis of Preparation above). In particular when services are rendered, and whether the service has been rendered. The management of the municipality is satisfied that recognition of the revenue in the current year is appropriate.

#### 1.2.2 Financial assets and liabilities

The classification of financial assets and liabilities into categories is based on judgment by management.

## 1.2.3 Impairment of Financial Assets

Accounting Policy 4.4 on *Impairment of Financial Assets* describes the process followed to determine the value by which financial assets should be impaired. In making the estimation of the impairment, the management of the municipality considered the detailed criteria of impairment of financial assets as set out in IAS 39: *Financial Instruments - Recognition and Measurement*. The management of the municipality is satisfied that the impairment of financial assets recorded during the year, is appropriate.

## 1.2.4 Useful lives of Property, Plant and Equipment ("PPE")

As described in Accounting Policies 2.3 and 3.2, the municipality depreciates/amortises its property, plant and equipment and intangible assets over the estimated useful lives of the assets, taking into account the residual values of the assets at the end of their useful lives, which is determined when the assets are available for use. The useful lives and residual values of the assets are based on industry knowledge.

#### 1.2.5 Impairment: Write down of PPE

Significant estimates and judgments are made relating to PPE impairment tests.

#### 1.2.6 Defined Benefit Plan Liabilities

As described in Accounting Policy 11.3, the municipality obtains actuarial valuations of its defined benefit plan liabilities. The defined benefit obligations of the municipality that were identified are Post-retirement Health Benefit Obligations and Long-service Awards. The estimated liabilities are recorded in accordance with the requirements of IAS 19. Details of the liabilities and the key assumptions made by the actuaries in estimating the liabilities are provided in Note 9 to the Annual Financial Statements.

Multi-employer defined benefit funds are accounted for as defined contribution plan as set out in note 9.

## 1.3 Presentation currency

The Annual Financial Statements are presented in South African Rand, rounded off to the nearest Rand which is the municipality's functional currency.

#### 1.4 Going concern assumption

The Annual Financial Statements have been prepared on a going concern basis.

#### 1.5 Offsetting

Assets, liabilities, revenues and expenses have not been offset, except when offsetting is required or permitted by a Standard of GRAP.

#### 1.6 Standards, amendments to standards and interpretations issued but not yet effective

The following GRAP standards have been issued but are not yet effective and have not been early adopted by the municipality:

GRAP 18 Segment Reporting - issued March 2005

GRAP 21 Impairment of Non-cash-generating Assets - issued March 2009

GRAP 23 Revenue from Non-Exchange Transactions (Taxes and Transfers) - issued February 2008

GRAP 24 Presentation of Budget Information in Financial Statements - issued November 2007

GRAP 25 Employee Benefits - issued December 2009

GRAP 26 Impairment of Cash-generating Assets - issued March 2009

GRAP 103 Heritage Assets - issued July 2008

GRAP 104 Financial Instruments – October 2009

Management has considered all of the above-mentioned GRAP standards issued but not yet effective and anticipates that the adoption of these standards will not have a significant impact on the financial position, financial performance or cash flows of the municipality.

## 2. PROPERTY, PLANT AND EQUIPMENT

#### 2.1 Initial Recognition

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of services, rental to others, or for administrative purposes, and are expected to be used during more than one year.

The cost of an item of property, plant and equipment is recognised as an asset if, and only if it is probable that future economic benefits or service potential associated with the item will flow to the municipality, and if the cost or fair value of the item can be measured reliably.

Property, plant and equipment are initially recognised at cost on its acquisition date or in the case of assets acquired by grant or donation, deemed cost, being the fair value of the asset on initial recognition. The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by the municipality. Trade discounts and rebates are deducted in arriving at the cost. The cost, where applicable, also includes the necessary costs of dismantling and removing the asset and restoring the site on which it is located.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Where an asset is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

The cost of an item of property, plant and equipment acquired in exchange for non-monetary assets or monetary assets, or a combination of monetary and non-monetary assets is measured at its fair value. If the acquired item could not be measured at its fair value, its cost was measured at the carrying amount of the asset given up.

Major spare parts and servicing equipment qualify as property, plant and equipment when the municipality expects to use them during more than one period. Similarly, if the major spare parts and servicing equipment can be used only in connection with an item of property, plant and equipment, they are accounted for as property, plant and equipment.

#### 2.2 Subsequent Measurement

Subsequent expenditure relating to property, plant and equipment is capitalised if it is probable that future economic benefits or potential service delivery associated with the subsequent expenditure will flow to the entity and the cost or fair value of the subsequent expenditure can be reliably measured. Subsequent expenditure incurred on an asset is only capitalised when it increases the capacity or future economic benefits associated with the asset. Where the municipality replaces parts of an asset, it derecognises the part of the asset being replaced and capitalises the new component.

Subsequently all property plant and equipment, are measured at cost (which includes deemed cost for previously unrecognised assets), less accumulated depreciation and accumulated impairment losses.

Compensation from third parties for items of property, plant and equipment that were impaired, lost or given up is included in surplus or deficit when the compensation becomes receivable.

## 2.3 Depreciation

Land is not depreciated as it is regarded as having an indefinite useful life. Depreciation on assets other than land is calculated on cost, using the straight line method, to depreciate their cost to their residual values over the estimated useful lives of the assets. The depreciation method used reflects the pattern in which the asset's future economic benefits or service potential are expected to be consumed by the municipality. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately. The depreciation rates are based on the following estimated useful lives.

Depreciation only commences when the asset is available for use, unless stated otherwise.

## SISONKE DISTRICT MUNICIPALITY ACCOUNTING POLICIES FOR THE YEAR ENDED 30 JUNE 2012

Details	Years
<u>Sewerage</u>	
Sewers	20 years
Outfall sewers	20 years
Purification works	20 years
Sewerage pumps	15 years
Sludge machines	15 years
Water	
Meters	15 years
Mains	20 years
Rights	20 years
Supply/reticulation	20 years
Reservoirs & Tanks	20 years
OTHER ASSETS	
Buildings	
Office buildings	30 years
Workshops/depots	30 years
Office equipment	
Computer hardware	5 years
Computer software	3-5 years
Office machines	3-5 years
Air conditioners	5-7 years

## **Furniture And Fittings**

Chairs	7-10 years
Tables/desks	7-10 years

## SISONKE DISTRICT MUNICIPALITY ACCOUNTING POLICIES FOR THE YEAR ENDED 30 JUNE 2012

Cabinets/cupboards	7-10 years
Miscellaneous	7-10 years
Motor Vehicles	
Trucks/LDV's	5-7 years
Plant and Equipment	
Tractors	10-15 years
Lawnmowers	2 years
Compressors	5 years
Laboratory equipment	5 years
General	5 years

The assets' residual values, estimated useful lives and depreciation methods are reviewed annually, and adjusted prospectively if appropriate, at each reporting date.

## 2.4 Incomplete Construction Work

Incomplete construction work is stated at historical cost. Depreciation only commences when the asset is available for use.

## 2.5 Finance Leases

Assets capitalised under finance leases are depreciated over their expected useful lives on the same basis as PPE controlled by the entity or where shorter, the term of the relevant lease if there is no reasonable certainty that the municipality will obtain ownership by the end of the lease term.

#### 2.6 Infrastructure Assets

Infrastructure Assets are any assets that are part of a network of similar assets. Infrastructure assets are shown at cost less accumulated depreciation and accumulated impairment. Infrastructure assets are treated similarly to all other assets of the municipality.

## 2.7 Derecognition of property, plant and equipment

The carrying amount of an item of property, plant and equipment is derecognised on disposal, or when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. Gains are not included in revenue.

Gains or losses are calculated as the difference between the net book value of assets (cost less accumulated depreciation and accumulated impairment losses) and the sales proceeds. This included in the Statement of Financial Performance as a gain or loss on disposal of property, plant and equipment.

#### 2.8 Impairment of assets

#### 2.8.1 Impairment of Cash generating assets

The municipality assesses at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, the municipality estimates the recoverable amount of the asset.

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the recoverable amount of the cash-generating unit to which the asset belongs is determined.

The recoverable amount of an asset or a cash-generating unit is the higher of its fair value less costs to sell and its value in use.

If the recoverable amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. That reduction is an impairment loss.

An impairment loss of assets carried at cost less any accumulated depreciation or amortisation is recognised immediately in surplus or deficit.

An impairment loss is recognised for cash-generating units if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment loss is allocated to reduce the carrying amount of the assets of the unit as follows:

• to the assets of the unit, pro rata on the basis of the carrying amount of each asset in the unit.

A municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for assets may no longer exist or may have decreased. If any such indication exists, the recoverable amounts of those assets are estimated.

The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss of assets carried at cost less accumulated depreciation or amortisation is recognised immediately in surplus or deficit.

#### 2.8.2 Impairment of non-cash generating assets

The municipality assesses at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

If there is any indication that an asset may be impaired, the recoverable service amount is estimated for the individual asset. If it is not possible to estimate the recoverable service amount of the individual asset, the recoverable service amount of the cash-generating unit to which the asset belongs is determined.

The recoverable service amount of an asset or a non-cash-generating unit is the higher of its fair value less costs to sell and its value in use.

If the recoverable service amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. That reduction is an impairment loss.

An impairment loss of assets carried at cost less any accumulated depreciation or amortisation is recognised immediately in surplus or deficit.

An impairment loss is recognised for non-cash-generating units if the recoverable service amount of the unit is less than the carrying amount of the unit. The impairment loss is allocated to reduce the carrying amount of the assets of the unit as follows:

• to the assets of the unit, pro rata on the basis of the carrying amount of each asset in the unit.

A municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for assets may no longer exist or may have decreased. If any such indication exists, the recoverable service amounts of those assets are estimated.

The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss of assets carried at cost less accumulated depreciation or amortisation is recognised immediately in surplus or deficit.

#### 3. INTANGIBLE ASSETS

#### 3.1 Initial Recognition

Identifiable non-monetary assets without physical substance which are held for use in the production or supply of services, for rental to others, or for administrative purposes are classified and recognised as intangible assets. The municipality recognises an intangible asset in its Statement of Financial Position only when it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality and the cost or fair value of the asset can be measured reliably.

Internally generated intangible assets are subject to strict recognition criteria before they are capitalised. Research expenditure is recognised as an expense when incurred.

Other development expenditures that do not meet these criteria are recognised as an expense as incurred. Development costs previously recognised as an expense are not recognised as an asset in a subsequent period. Capitalised development costs are recorded as intangible assets and amortised from the point at which the asset is ready for use on a straight-line basis over its useful life, not exceeding five years. Development assets are tested for impairment annually. Intangible assets are initially recognised at cost. Intangible assets acquired separately or internally generated are reported at cost less accumulated amortisation and accumulated impairment losses. Where an intangible asset is acquired at no cost or for a nominal consideration, its cost is its fair value as at the date it is acquired. Where an intangible asset is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

#### 3.2 Subsequent Measurement, Amortisation and Impairment

Amortisation is charged on a straight-line basis over the intangible assets' useful lives, which are estimated to be between 3 to 5 years. Where intangible assets are deemed to have an indefinite useful life, such intangible assets are not amortised, for example servitudes obtained by the municipality give the municipality access to land for specific purposes for an unlimited period - however, such intangible assets are subject to an annual impairment test.

Intangible assets are annually tested for impairment, including intangible assets not yet available for use. Where items of intangible assets have been impaired, the carrying value is adjusted by the impairment loss, which is recognised as an expense in the period that the impairment is identified except where the impairment reverses a previous revaluation. The impairment loss is the difference between the carrying amount and the recoverable amount.

The estimated useful life and amortisation method are reviewed annually. Any adjustments arising from the annual review are applied prospectively as a change in accounting estimate in the Statement of Financial Performance.

#### 3.3 Derecognition

Intangible assets are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an intangible asset is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

#### 4. FINANCIAL INSTRUMENTS

The municipality has various types of financial instruments and these can be broadly categorised as either *Financial Assets* or *Financial Liabilities*.

#### 4.1 Financial Assets - Classification

A financial asset is any asset consisting of cash or a contractual right to receive cash. The municipality has the following types of financial assets as reflected on the face of the Statement of Financial Position or in the notes thereto:

- Investments in Fixed Deposits (Banking Institutions, etc)
- Unlisted investments
- Consumer Debtors
- Certain Other Debtors (see note 2.3)
- Short-term Investment Deposits
- Bank Balances and Cash

In accordance with IAS 39.09, the *Financial Assets* of the municipality are classified as follows into the four categories allowed by this standard:

.09

Type of Financial Asset	Classification in terms of IAS 39.
Short-term Investment Deposits – Call	Held-to-maturity investments
Cash and cash equivalents	Loans and receivables
Consumer Debtors	Loans and receivables
Other Debtors	Loans and receivables
Investments in Fixed Deposits	Held-to-maturity investments
Unlisted investments	Held-to-maturity investments

Available for sale investments are financial assets that are designated as available for sale or are not classified as:

- Loans and Receivables;
- Held-to-Maturity Investments; or
- Financial Assets at fair value through the Statement of Financial Performance.

Loans and Receivables are non derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for maturities greater than 12 months, which are classified as non-current assets.

*Held-to-Maturity Investments* are financial assets with fixed or determinable payments and fixed maturity where the municipality has the positive intent and ability to hold the investment to maturity.

Cash includes cash on hand (including petty cash) and cash with banks (including call deposits). Cash equivalents are short-term highly liquid investments, readily convertible into known amounts of cash that are held with registered banking institutions with maturities of three months or less and are subject to an insignificant risk of change in value. For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, deposits held on call with banks, net of bank overdrafts. The municipality categorises cash and cash equivalents as financial assets: loans and receivables.

#### 4.2 Financial Liabilities - Classification

A financial liability is a contractual obligation to deliver cash or another financial asset to another entity. The municipality has the following types of financial liabilities as reflected on the face of the Statement of Financial Position or in the notes thereto:

- Long-term Liabilities
- Trade and other payables (see note 6)
- Bank Overdraft
- Short-term loans
- Consumer Deposits

There are two main categories of *Financial Liabilities*, the classification determining how they are measured. Financial liabilities may be measured at:

- Fair value through surplus or deficit
- Amortised cost ("other financial liabilities")

Any other financial liabilities are classified as "Other financial liabilities" and are initially measured at fair value, net of transaction costs. Other financial liabilities are subsequently measured at amortised cost using the effective interest method, with interest expense recognised on an effective yield basis.

In accordance with IAS 39.09 the Financial Liabilities of the municipality are all classified as "Other financial liabilities".

#### 4.3 Initial and Subsequent Measurement

#### 4.3.1 Financial Assets:

Held-to-maturity Investments and Loans and Receivables are initially measured at fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset. Subsequently, these assets are measured at amortised cost using the effective interest method less, any impairment, with interest recognised on an effective yield basis in surplus /deficit.

Financial Assets at Available-for-Sale are initially and subsequently, at the end of each financial year, measured at fair value with the profit or loss being recognised in the Statement of Financial Performance.

Financial assets are recognised on the date they originated for loans and receivables and deposits and for other financial assets, initially on the trade date at which the municipality becomes a party to the contractual provisions of the instrument.

#### 4.3.2 Financial Liabilities:

Other financial liabilities are subsequently measured at amortised cost using the effective interest method, with interest expense recognised on an effective yield basis.

Financial liabilities are recognised on the trade date at which the municipality becomes a party to the contractual provisions of the instrument.

#### 4.4 Impairment of Financial Assets

Financial assets are assessed for indicators of impairment at each balance sheet date. Financial assets are impaired where there is objective evidence of impairment of financial assets (such as the probability of insolvency or significant financial difficulties of the debtor). If there is such evidence the recoverable amount is estimated and an impairment loss is recognised in accordance with IAS 39.

An estimate is made for doubtful debt based on past default experience of all outstanding amounts at yearend. Bad debts are written off the year in which they are identified as irrecoverable.

A provision for impairment of trade receivables is established when there is objective evidence that the municipality will not be able to collect all amounts due according to the original terms of receivables. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate.

Consumer Debtors are stated at cost less a provision for bad debts. The provision is made in accordance with IAS 39.64 whereby the recoverability of Consumer Debtors is assessed individually and then collectively after grouping the assets in financial assets with similar credit risk characteristics. The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of trade receivables, where the carrying amount is reduced through the use of an allowance account. When a trade receivable is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognised in the Statement of Financial Performance.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed through the Statement of Financial Performance to the extent that the carrying amount of the instruments at the date the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised.

#### 4.5 Derecognition of Financial Assets

The municipality derecognises financial assets only when the contractual rights to the cash flows from the asset expire or it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity, except when Council approves the write-off of financial assets due to non recoverability.

If the municipality neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the municipality recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the municipality retains substantially all the risks and rewards of ownership of a transferred financial asset, the municipality continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

## 4.6 Derecognition of Financial Liabilities

The municipality derecognises Financial Liabilities when, and only when, the municipality's obligations are discharged, cancelled or they expire.

## 5. RISK MANAGEMENT OF FINANCIAL ASSETS AND LIABILITIES

It is the policy of the municipality to disclose information that enables the user of its financial statements to evaluate the nature and extent of risks arising from financial instruments to which the municipality is exposed on the reporting date.

Risks and exposure are disclosed as follows:

#### 5.1 Credit Risk

- Each class of financial instrument is disclosed separately.
- Maximum exposure to credit risk not covered by collateral is specified.
- Financial instruments covered by collateral are specified.

#### 5.2 Liquidity Risk

Liquidity risk is the risk that the municipality will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset.

A maturity analysis is prepared for financial assets and liabilities that shows the remaining contractual maturities.

- Liquidity risk is managed by ensuring that all assets are reinvested at maturity at competitive interest
  rates in relation to cash flow requirements. Liabilities are managed by ensuring that all contractual
  payments are met on a timeous basis and, if required, additional new arrangements are established
  at competitive rates to ensure that cash flow requirements are met.
- A maturity analysis for financial liabilities (where applicable) that shows the remaining undiscounted contractual maturities is disclosed in the notes to the annual financial statements.

#### 5.3 Interest Risk

Interest rate risk originates from the uncertainty about the fair value or future cash flows of a financial instrument which fluctuate because of changes in market interest rates.

- Borrowings issued at variable rates expose the municipality to cash flow interest rate risk.
- Borrowings issued at fixed rates expose the municipality to fair value interest rate risk.

Management has assessed the impact of interest rate risk on the operations of the municipality and considers the risk to be negligible.

#### 5.4 Market Risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rate and equity prices will affect the municipalities' income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

#### 6. INVENTORIES

## 6.1 Initial recognition

Inventories comprise current assets held for sale, consumption or distribution during the ordinary course of business. Inventories are initially recognised at cost. Cost generally refers to the purchase price, plus taxes, transport costs and any other costs in bringing the inventories to their current location and condition.

## 6.2 Subsequent measurement

The carrying amount of inventories is recognised as an expense in the period that the inventory was sold, distributed, written off or consumed, unless that cost qualifies for capitalisation to the cost of another asset.

## 7. NON-CURRENT ASSETS HELD-FOR-SALE

#### 7.1 Initial Recognition

Non-current Assets and Disposal Groups are classified as held-for-sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the sale is highly probable and the asset (or disposal group) is available for immediate sale in its present condition. Council must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

#### 7.2 Subsequent Measurement

Non-current Assets (and Disposal Groups) classified as held-for-sale are measured at the lower of carrying amount and fair value less costs to sell.

A non-current asset is not depreciated (or amortised) while it is classified as held for sale, or while it is part of a disposal group classified as held for sale.

Interest and other expenses attributable to the liabilities of a disposal group classified as held for sale are recognised in surplus or deficit.

#### 8. **REVENUE RECOGNITION**

#### 8.1 General

Revenue comprises the fair value of the consideration received or receivable from exchange or nonexchange transactions in the ordinary course of the municipality's activities. Revenue is shown net of valueadded tax, returns, rebates and discounts.

The municipality recognises revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the municipality and when specific criteria have been met for each of the municipalities' activities as described below. The amount of revenue is not considered to be reliably measurable until all contingencies relating to the sale have been resolved. The municipality bases its estimates on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement.

Revenue from exchange transactions refers to revenue that accrued to the municipality directly in return for services rendered / goods sold, the value of which approximates the consideration received or receivable.

Revenue from non-exchange transactions refers to transactions where the municipality received revenue from another entity without directly giving approximately equal value in exchange. Revenue from non-exchange transactions is generally recognised to the extent that the related receipt or receivable qualifies for recognition as an asset and there is no liability to repay the amount.

#### 8.2 Revenue from Exchange Transactions

## 8.2.1 Service Charges

Service charges relating to water are based on consumption. Meters are read on a monthly basis and are recognised as revenue when invoiced. Provisional estimates of consumption, based on the consumption history, are made monthly when meter readings have not been performed. The provisional estimates of consumption are recognised as revenue when invoiced, except at year-end when estimates of consumption up to year-end are recorded as revenue without being invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. These adjustments are recognised as revenue in the invoicing period. In respect of estimates of consumption between the last reading date and the reporting date, an accrual is made based on the average monthly consumption of consumers.

In circumstances where services cannot readily be measured and quantified, a flat rate service charge is levied monthly on such properties.

#### 8.2.2 Finance income

Interest earned on investments is recognised in the Statement of Financial Performance on the time proportionate basis that takes into account the effective yield on the investment.

#### 8.2.3 Tariff Charges

Revenue arising from the application of the approved tariff of charges is recognised when the relevant service is rendered by applying the relevant authorised tariff.

#### 8.2.4 Rentals

Revenue from the rental of facilities and equipment classified as operating leases is recognised on a straightline basis over the term of the lease agreement, where such lease periods span over more than one financial year.

#### 8.3 Revenue from Non-exchange Transactions

#### 8.3.1 Property rates

Revenue from property rates is recognised when the legal entitlement to this revenue arises. Collection charges are recognised when such amounts are legally enforceable. Penalty interest on unpaid rates is recognised on a time proportion basis with reference to the principal amount receivable and effective interest rate applicable. A composite rating system charging different rate tariffs is employed. Rebates are granted to certain categories of ratepayers and are deducted from revenue

With effect 1 July 2011 property rates are no longer assessed as this only applied to District Municipal Areas.

#### 8.3.2 Public contributions

Revenue from public contributions is recognised when all conditions associated with the contribution have been met or where the contribution is to finance property, plant and equipment, when such items of property, plant and equipment are brought into use. Where public contributions have been received and the municipality has not met the condition, a liability is recognised.

#### 8.3.3 Revenue from Recovery of Unauthorised, Irregular, Fruitless and Wasteful Expenditure

Revenue from the recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, including those set out in the Municipal Finance Management Act (Act No.56 of 2003) and is recognised when the recovery thereof from the responsible councillors or officials is virtually certain. Such revenue is based on legislated procedures.

## 9. GOVERNMENT GRANTS AND RECEIPTS

Income received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met, a liability is recognised. Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the municipality with no future related costs, are recognised in the Statement of Financial Performance in the period in which they become receivable.

Interest earned on investments is treated in accordance with grant conditions. If it is payable to the funder it is recorded as part of the creditor and if it is the municipality's interest it is recognised as interest earned in the Statement of Financial Performance.

#### 10. PROVISIONS

Provisions are recognised when the municipality has a present or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation and a reliable estimate can be made of the obligation.

Future events that may affect the amount required to settle an obligation are reflected in the amount of a provision where there is sufficient objective evidence that they will occur. Gains from the expected disposal of assets are not taken into account in measuring a provision. Provisions are not recognised for future operating losses. The present obligation under an onerous contract is recognised and measured as a provision.

Provisions are reviewed at reporting date and the amount of a provision is the present value of the expenditure expected to be required to settle the obligation. When the effect of discounting is material, provisions are determined by discounting the expected future cash flows that reflect current market assessments of the time value of money. The impact of the periodic unwinding of the discount is recognised in the Statement of Financial Performance as a finance cost as it occurs.

#### 11. EMPLOYEE BENEFITS

#### 11.1 Short-term Employee Benefits

Remuneration to employees is recognised in the Statement of Financial Performance as the services are rendered, except for non-accumulating benefits, which are only recognised when the specific event occurs.

The municipality treats its provision for leave pay as an accrual.

The costs of all short-term employee benefits such as leave pay, are recognised during the period in which the employee renders the related service. The liability for leave pay is based on the total accrued leave days at year end and is shown as a provision in the Statement of Financial Position. The municipality recognises the expected cost of performance bonuses only when the municipality has a present legal or constructive obligation to make such payment and a reliable estimate can be made.

#### **11.2 Defined Contribution Plans**

A defined contribution plan is a plan under which the municipality pays fixed contributions into a separate entity. The municipality has no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to service in the current or prior periods.

The municipality's contributions to the defined contribution funds are established in terms of the rules governing those plans. Contributions are recognised in the Statement of Financial Performance in the period in which the service is rendered by the relevant employees. The municipality has no further payment obligations once the contributions have been paid.

#### 11.3 Post retirement benefits

A defined benefit plan is a post- employment benefit plan other than a defined contribution plan.

#### 11.3.1 Pension obligations

The municipality and its employees contribute to 4 different pension funds, namely Natal Joint Municipal Pension Fund and South African Local Authority Pension Fund. The KSN Municipal Pension Fund is a defined contribution fund. The contributions to fund obligations for the payment of retirement benefits are charged against income in the year they become payable. Natal Joint Provident, Superannuation & Retirement Funds and Government Employee Pension Fund are defined benefit funds. The Natal Joint Provident Fund and South African Local Authority Pension Fund are defined contribution funds.

The schemes are funded through payments to fund administrator or trustee-administered funds, determined by periodic actuarial calculations. The Municipality has both defined benefit and defined contribution plans.

#### SISONKE DISTRICT MUNICIPALITY ACCOUNTING POLICIES FOR THE YEAR ENDED 30 JUNE 2012

Defined benefit plans have been accounted for as defined contribution plans in accordance with the requirements on multi-employer plans where sufficient information is not available to account for such plans as defined benefit plans. As the fund administrators do not have sufficient information available to allocate the shortfall on liabilities to individual employers, no liability is recognised for any shortfall of fund asset as compared to fund liabilities. Any surcharges that may be levied by the fund from time to time in order to compensate for shortfalls, are recognised as expenses in the period in which they become payable to the fund. As surcharges are advised long in advance, based on actuarial valuations of the fund as a whole, the necessary provision for the payment thereof is made in the course of the municipality's normal budgeting processes.

For defined contribution plans, the Municipality pays contributions to fund administrators. The Municipality has no further payment obligations once the contributions have been paid. The contributions are recognised as employee benefit expense when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available.

#### 11.3.2 Post-retirement Health Care Benefits:

The municipality has an obligation to provide Post-retirement Health Care Benefits to certain of its retirees. According to the rules of the Medical Aid Funds, with which the municipality is associated, a member (who is on the current Conditions of Service), on retirement, is entitled to remain a continued member of the Medical Aid Fund, in which case the municipality is liable for a certain portion of the medical aid membership fee.

The liability is the aggregate of the present value of the defined obligation and recognised actuarial gains and losses, adjusted by past service costs where applicable. The plan is unfunded. The present value of the defined benefit obligation is calculated using the projected unit credit method, incorporating actuarial assumptions and an appropriate discount rate. Valuations of these obligations are carried out every year by independent qualified actuaries.

Actuarial gains or losses are accounted for in full and are recognised in the Statement of Financial Performance.

## 11.3.3 Long-service Allowance

The municipality has an obligation to provide Long-service Allowance Benefits to all of its employees. According to the rules of the Long-service Allowance Scheme, which the municipality instituted and operates, an employee (who is on the current Conditions of Service), is entitled to a cash allowance, as well as additional once-off leave calculated in terms of the rules of the scheme, after 10, 15, 20, 25, 30, 35, 40 and 45 years of continued service.

The municipality's liability is based on an actuarial valuation. The projected unit credit method has been used to value the liabilities. Actuarial gains and losses on the long-term incentives are accounted for through the statement of financial performance.

Actuarial gains or losses are accounted for in full and are recognised in the Statement of Financial Performance.

## 12. LEASES

#### 12.1 The Municipality as Lessee

Leases are classified as finance leases where substantially all the risks and rewards associated with ownership of an asset are transferred to the municipality. Property, plant and equipment or Intangible Assets subject to finance lease agreements are capitalised at amounts equal to the fair value of the leased asset or, if lower, the present value of the minimum lease payments, each determined at the inception of the lease. Corresponding liabilities are included in the Statement of Financial Position as Finance Lease Liabilities. The corresponding liabilities are initially recognised at the inception of the lease and are measured as the sum of the minimum lease payments, discounted for the effect of interest. In discounting the lease payments, the municipality uses the interest rate that exactly discounts the lease payments and unguaranteed residual value to the fair value of the asset plus any direct costs incurred.

Lease payments are allocated between the lease finance cost and the capital repayment using the effective interest rate method. Lease finance costs are expensed when incurred.

Subsequent to initial recognition, the leased assets are accounted for in accordance with the stated accounting policies applicable to property, plant, equipment or intangible assets. The lease liability is reduced by the lease payments, which are allocated between the lease finance cost and the capital repayment using the effective interest rate method. The lease asset is depreciated over the shorter of the asset's useful life or the lease term.

Operating leases are those leases that do not fall within the scope of the above definition. Operating lease rentals are recognised as an expense in the statement of financial performance on a straight-line basis over the term of the relevant lease.

#### 13. BORROWING COSTS

The municipality capitalises borrowing costs incurred that are directly attributable to the acquisition, construction or production of a qualifying asset as part of the cost of that asset only when the commencement date for capitalisation is on or after 1 July 2008, while all other borrowing costs incurred (including borrowing cost incurred on qualifying assets where the commencement date for capitalisation is prior to 1 July 2008) are recognised as an expense in the Statement of Financial Performance in accordance with the requirements of GRAP 5 and ASB Directive 3.

It is considered inappropriate to capitalise borrowing costs where the link between the funds borrowed and the capital asset acquired cannot be adequately established - the municipality expenses borrowing costs when it is inappropriate to capitalise it. The municipality ceases the capitalisation of borrowing costs when substantially all the activities to prepare the asset for its intended use or sale are complete.

#### 14. VALUE ADDED TAX

The Municipality accounts for Value Added Tax on the payments basis.

#### 15. CASH AND CASH EQUIVALENTS

Cash includes cash-on-hand and cash with banks. Cash equivalents are short-term highly liquid investments that are held with registered banking institutions with maturities of three months or less and are subject to an insignificant risk of change in value.

For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, deposits held on call with banks and investments in financial instruments, net of bank overdrafts.

Bank overdrafts are recorded based on the facility utilised. Finance charges on bank overdrafts are expensed as incurred.

#### 16. UNAUTHORISED EXPENDITURE

Unauthorised expenditure is expenditure that has not been budgeted, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, municipality or organ of state and expenditure in the form of a grant that is not permitted in terms of the Municipal Finance Management Act (Act No 56 of 2003). Unauthorised expenditure is accounted for as an expense in the Statement of Financial Performance and where recovered, it is subsequently account for as revenue in the statement of financial performance

#### 17. IRREGULAR EXPENDITURE

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No 56 of 2003), the Municipal Systems Act (Act No 32 of 2000), and the Public Office Bearers Act (Act No 20 of 1998) or is in contravention of the Municipality's or Municipal Entities' supply chain management policies. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as an expense in the

Statement of Financial Performance, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

#### 18. FRUITLESS AND WASTEFUL EXPENDITURE

Fruitless and wasteful expenditure is expenditure that was made in vain and would have been avoided had reasonable care been exercised. Fruitless and wasteful expenditure is accounted for as expenditure in the Statement of Financial Performance, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

#### CHANGES IN ACCOUNTING POLICIES, ESTIMATES AND ERRORS

Changes in accounting policies that are affected by management have been applied retrospectively in accordance with GRAP 3 requirements, except to the extent that it is impracticable to determine the period-specific effects or the cumulative effect of the change in policy. In such cases the municipality shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable.

Changes in accounting estimates are applied prospectively in accordance with GRAP 3 requirements. Details of changes in estimates are disclosed in the notes to the annual financial statements where applicable.

Errors are corrected retrospectively in the period in which the error has occurred in accordance with GRAP 3 requirements, except to the extent that it is impracticable to determine the period-specific effects or the cumulative effect of the error. In such cases the municipality shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable.

#### **19. RELATED PARTIES**

Individuals as well as their close family members, and/or entities are related parties if one party has the ability, directly or indirectly, to control or jointly control the other party or exercise significant influence over the other party in making financial and/or operating decisions. Key management personnel is defined as the Municipal Manager, Chief Financial Officer and all other managers reporting directly to the Municipal Manager or as designated by the Municipal Manager.

#### 20. EVENTS AFTER THE REPORTING DATE

Events after the reporting date that have been classified as adjusting events have been accounted for in the Annual Financial Statements. The events after the reporting date that are classified as non-adjusting events after the reporting date have been disclosed in the notes to the Annual Financial Statements.

#### 21. COMPARATIVE INFORMATION

#### 21.1 Prior year comparatives

When the presentation or classification of items in the Annual Financial Statements is amended, prior period comparative amounts are reclassified. The nature and reasons for the reclassification are disclosed.

## 22. CONTINGENT ASSETS AND CONTINGENT LIABILITIES

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in the notes to the annual financial statements.

#### 9.1 RETIREMENT BENEFIT LIABILITY

Post-retirement Health Care Benefit Liability

Balance at beginning of year	3 956 553	2 999 651
Contributions to Provision	1 421 713	990 790
Benefits paid	(37 104)	(33 888)
Balance at end of year	5 341 162	3 956 553
Less current portion	41 292	37 104
Non-current portion	5 299 870	3 919 449

The following information regarding Health Care benefits pertains to the 2012 financial year: Post-retirement Health Care Benefit Liability - Continued

The municipality provides certain post-retirement health care benefits by funding the medical aid contributions of qualifying retired members of the municipality.

The most recent actuarial valuations of plan assets and the present value of the defined benefit obligation were carried out at 30 June 2012 by Mr C Weiss Fellow of the Actuarial Society of South Africa. The present value of the defined benefit obligation, and the related current service cost and past service cost, were measured using the Projected Unit Credit Method.

The members of the post-employment Medical Aid Benefit Plan are made up as follows:

Total Members	154	135
Continuation Members (Retirees, widowers and orphans)	1	1
In-service Members (Employees)	153	134
IOIIOWS.		

4 788 965

5 341 162

552 197

3 448 921

507 632

3 956 553

The liability in respect of past service has been estimated as follows: In-service Members Continuation Members Total Liability

The municipality makes monthly contributions for health care arrangements to the following Medical Aid Schemes: Bonita's Hosmed Keyhealth LA Health Samwumed

The principal assumptions used for the purposes of the actuarial valuations were as follows:

Discount rate	8.48%	8,76%
Health Care Cost inflation Rate	7.2%	7,49%
Net Effective Discount Rate	1.2%	1,19%
Expected Retirement Age - Females	55	55
Expected Retirement Age - Males	60	60
Movements in the present value of the Defined Benefit Obligations were as follows		
Balance at the beginning of the year:	3 956 553	2 999 651
Current service costs	556 359	372 740
Interest cost	351 843	271 116
Benefits paid	(37 104)	(33 888)
Actuarial losses/ (gains)	513 511	346 934
Present Value of Fund Obligation at the end of the year	5 341 162	3 956 553
The amounts recognised in the Statement of Financial Performance are as follows		
Current service cost	556 359	372 740
Interest cost	351 843	271 116
Actuarial losses / (gains	513 511	346 934
Total Post-retirement Benefit included in Employee Related cost	1 421 713	990 790

#### : SENSITIVITY ANALYSIS

The results presented are based on a number of assumptions. The extent to which the actual liability faced in the future by the Municipality differs from these results will depend on the extent to which actual experience differs from the assumptions made. The assumption which tends to have the greatest impact on the results is the rate of health care cost inflation relative to the discount rate.

#### Sensitivity Results

The liability at the Valuation Date was recalculated to show the effect of:

(i) A 1% increase and decrease in the assumed rate of health care cost inflation;

(ii) A one-year age reduction in the assumed rates of post-retirement mortality;
 (iii) A one-year decrease in the assumed average retirement age; and

(iii) A one-year decrease in the assumed average retirement (iv) A 50% reduction in the assumed withdrawal rates

The following Table summarises the results of the sensitivity analysis.

#### Post-retirement Health Care Benefit Liability - Continued

: Sensitivity Analysis on the Accrued Liability (R Millions)

Assumption	Change	In-service	Continuation	Total	%
•					change
Central Assumptions		4.789	0.552	5.341	
Health care inflation	1%	5.692	0.585	6.278	18%
	-1%	4.054	0.523	4.577	-14%
Post-retirement mortality	-1 yr	4.962	0.575	5.536	4%
Average retirement age	-1 yr	5.522	0.552	6.074	14%
Withdrawal Rate	-50%	5.737	0.552	6.289	18%

Note: The post-retirement mortality adjustment assumes that someone aged 70 will experience the mortality of someone aged 69. The liability is expected to increase under this scenario because members are expected to live longer

The table above indicates, for example, that if medical inflation is 1% greater than the long-term assumption made, the liability will be 20% higher than that shown.

: Sensitivity Analysis on the Current-service and Interest Costs for the year ending 30/06/2012

Assumption	Change	Current- service Cost	Interest Cost	Total	% change
Central Assumptions		556,400	351,800	908,200

#### 9.2 Long Services Awards Provision

Provision for Long-term Service	2 303 202	1 886 572
Total Provision	2 303 202	1 886 572
The movement in the provision are reconciled as follows: Long-term Service		
Balance at beginning of year	1 886 572	1 469 353
Contribution to provision	681 456	593 233
Benefits paid	(264 826)	(176 014)
Balance at end of year	2 303 202	1 886 572
Less Current Portion	176 112	264 826
Non-current Portion	2 127 090	1 621 746
Long-service Awards The municipality operate an unfunded defined benefit plan for all its employees. Under the plan a Long-service Award is payable after 10 years thereafter to employees. The most recent actuarial valuations of plan assets and the present value of the defined benefit obligation were carried out at 30 June 2012 by Mr C Weiss, Fellow of the Actuarial Society of South Africa. The principal assumptions used for the purposes of the actuarial valuation were as follows: Discount rate Salary Cost inflation rate Nett Effective Discount Rate Expected Retirement Age - Females Expected retirement Age - Males	6.76% 5.95% 0.76% 55 60	8,01% 6,32% 1,59% 55 60
Long Services Awards Provision - Continued The following information regarding Long Service provision pertains to the 2012 financial year:		
Movements in the present value of the Defined Benefit Obligation were as follows:		
Balance at the beginning of the year	1 886 572	1 469 353
Current service cost	353 790	228 987
Interest cost	140 784	112 859
Benefits paid	(264 826) 186 882	(176 014)
Actuarial losses/(gains) Fund obligation at the end of the year	2 303 202	251 387 <b>1 886 572</b>
	2 303 202	1 000 372

#### SENSITIVITY ANALYSIS

The results presented are based on a number of assumptions. The extent to which the actual liability faced in the future by the municipality differs from these results will depend on the extent to which actual experience differs from the assumptions made.

The assumptions which tend to have the greatest impact on the results are: (1) The discount rate relative to the salary inflation assumptions; (2) The average retirement age of employees; and (3) Assumed rates of withdrawal of employees from service.

#### SENSITIVITY RESULTS

The liability at the Valuation Date was recalculated to show the effect of: (1) A 1% increase and decrease in the assumed general salary inflation rate; (2) A two-year decrease and increase in the assumed average retirement age of employees; and

(3) A 50% decrease in the assumed withdrawal rates from service.

## Sensitivity Analysis on the Unfunded accrued liability (in R Millions)

Assumption	Change	Liability	% Change

Operating Leases consists of the following:		

Operating lease payments represent rentals payable by the municipality for certain of its office properties. Leases are negotiated for an average term of seven years and rentals are fixed for an average of three years.

#### 34 RETIREMENT BENEFIT INFORMATION

The Council provides retirement benefits to employees by contributing to pension and provident funds. Membership of either pension or provident fund is compulsory for all permanent employees.

The personnel are members of the following pension funds: Natal Joint Municipal Pension fund(Provident) Actuarial valuation as at 31 March 2011 Results of valuation

The Fund self insures its risk benefits in excess of the full benefit. It therefore maintains a Risk Reserve Account as a measure of protection against volatility in claims experience.

#### Benefits:

Pension age - 65 years

Earliest retirement age - 55 years

Full benefit - Initial transfer plus member's contributions plus employer's contributions for full benefits plus investment earnings and bonuses.

Member's portion of full benefits - Initial transfer plus member's contributions plus investment earnings and bonuses. Benefit on retirement after earliest retirement age or pension age - Full benefit.

Benefit on retirement because of ill health - Full benefit

Benefit on death in service - Full benefit plus 0,7% of annual pensionable salary for each month of potential service to a maximum of 2.1 years salary.

#### Contributions:

Members may choose to contribute at a rate of 5%,7% or 9,25% of their pensionable emoluments in terms of regulation 14(a)

Participating employers contribute at a rate of 1,95 times of the rate of members contribution in terms of regulation 17(1)(b)

#### Benchmark:

The benchmark asset allocation determined as being appropriate for the fund, which takes cognisance of membership and liability profile, is stated below.

#### Natal Joint Municipal Pension Fund - (Retirement) Interim actuarial valuation

An interim actuarial valuation was performed on 31 March 2011

The statutory actuarial valuation as at 31 March 2000 disclosed that the fund was in shortfall. As required by the Pension Funds act, a "Scheme of Arrangement" was implemented so that the shortfall would be funded over the 9 year period 1 July 2001 to 30 June 2010. The initial surcharge has been reviewed at each annual actuarial valuation.

The employers and members are paying a surcharge equal to 17% of pensionable salaries which is expected to fund the deficit over a five year period to 30 June 2015.

On the DCF funding level has remained approximately the same.

The funding level not improving is mainly due to higher than expected salary increases which is largely offset by the surcharge that's being paid.

The fund's financial condition has improved, with the overall funding level increasing to 119.1% on the DCF method of valuation.

The regulations of the fund have been amended with effect from 1 July 2004, so that the Committee of Management is able to levy a separate surcharge on local authorities which grant excessive salary increases, thereby causing a financial strain on the Fund to the detriment of other stakeholders.

The employers are no longer permitting members to join the Fund, so that it is effectively closed to new members. This means that the average age will increase over time which, in turn, means that the required rate of contribution will also increase.

It is noted that for the DCF valuation at 31 March 2009, an actuarial adjustment of R24 million (investment reserve) was made to the market value of the assets.

On the revised valuation assumptions, a continuation of the current surcharge of 17% of pensionable salaries is required for 5 years after June 2010 to return the funding level to 100%

#### Benefits:

Pension age - 65 years

Final average emoluments - Average annual pensionable emoluments during the last year of service.

Pension on retirement at pension age - 2.1% of final average emoluments per year of continuous service.

Lump sum on retirement at pension age - 5.5% of final average emoluments per year of service.

Pension on retirement because of ill-health (minimum ten years continuous service) - Pension as for retirement at pension age(no pension payable if a member has had less than 10 years continuous service)

Lump sum on retirement because of ill-health (minimum 10 years continuous service) - Lump sum as for retirement at pension age(A benefit equal to the greater of a resignation benefit or double the member's contribution is paid if he has had less than ten years continuous service)

Pension on retirement because of retrenchment (minimum 10 years continuous service) - Pension as for retirement because of ill-health.

Surviving Spouses pension on death in service - 1,05% of final average emoluments per year of continuous service that the member would have had at the pension age.

Surviving Spouses pension on death of pensioner - 1,05% (0,77% in the case of a pensioner who retired before 1 July 1999) of final average emoluments per year of continuous service.

Lump sum on death in service - Annual pensionable emoluments.

Withdrawal - members contribution plus 5/12% for each month of continuous service (the addition is approximately equal to compound interest at 10% a year) and increased by 5% for each complete year of service up to a maximum of 20 years.

Prescribed minimum benefits: All benefits are subject to the minimum prescribed by the Pension Fund Act. **Benchmark:** 

The benchmark asset allocation determined as being appropriate for the fund, which takes cognisance of membership and liability profile, is stated below.

#### Natal Joint Municipal Pension Fund - (Superannuation) Statutory actuarial valuation as at 31 March 2011

The statutory valuation of the fund at 31 March 2005 disclosed that the Fund was in a shortfall position and therefore the Committee of Management levied a surcharge on the local authorities. The surcharge was increased from 6% to 7% effective 1 July 2007 and has been applied towards meeting the shortfall in respect of the liabilities. The Funds financial condition has deteriorated slightly to a funding level of 95.9%

This position will be reviewed at each future valuation to ensure that the fund does not fall into a shortfall position as a result of large salary increases.

Contributions payable to the Fund at the valuation date, excluding any surcharge expressed as a percentage of the pensionable salaries are: 9.25%

by members		
by local authorities		

The Employers are no longer permitting members to join the Fund, so that it is effectively closed to new members. This means that the average age of members will increase over time which in turn, means that the required rate of contribution will also increase.

The Fund self-insures its risk benefits. The Fund holds a Risk Reserve to cushion it against fluctuations in mortality experience

Based on the DCF method of valuation, the contribution rate payable at the valuation date was not sufficient to cover the contribution rate required for future service showing a small shortfall of 1,69% of pensionable salaries.

The shortfall in contributions amounts to approximately R13,8 million a year. We do not consider it necessary to adjust the employers rate of contribution at this stage. The matter of the shortfall in contributions will be addressed in the next statutory valuation of the fund as at 31 March 2011. Benefits:

Pension age - 65 years

Optional retiring date - The date on which a member attains the age of 60 years

Early retirement - as per the regulations

Final average emoluments - Average annual pensionable emoluments during the last year of service. Bonus service included in continuous service - One year for 20 completed years of continuous service and thereafter

one year for every five completed years of continuous service.

Commutation - A retiring member may commute up to one third of the pension for a lump sum

(members who transfer to the Fund on or after 12 March 1997 may commute a maximum of one seventh of the pension for a lump sum.

Pension on retirement at pension age or at optional retiring date -2.2% of final average emoluments per year of continuous service Lump sum on retirement at pension age or at optional retiring date -

8.25% of final average emoluments per year of service

Application has been made to the MEC for approval of the Remuneration of the Public Office Bearers, Act No. 20 of 1998 for the financial period 2011/2012. This is in accordance with the terms of grading system prescribed in the Annual Gazette on the determination of the upper limits of salaries, allowances and benefits of different members of the Municipal Council.	437 591	-
Should approval be granted the effect date of implementation of the said application will be 1 July 2011 resulting in a liability of R437 591 in respect of Councillors Allowances. Upon approval from the MEC council will adjust the 2012/2013 Medium-Term Revenue and Expenditure Framework accordingly, via a section 28 adjustment budget of the Municipal Finance Management Act No. 56 of 2003.	437 591	

#### 36 COMPARISON WITH THE BUDGET

The comparison of the Municipality's actual financial performance with the budget is set out in Annexure E(1). This will be available as at 30 June 2012

#### **37 FINANCIAL INSTRUMENTS**

#### Financial Risk Management Objectives

Due to the largely non-trading nature of activities and the way in which they are financed, municipalities are not exposed to the degree of financial risk faced by business entities. The municipality's Corporate Treasury function provides services to the business, co-ordinates access to domestic financial markets, monitors and manages the financial risk relating to the operations of the Municipality. These risks include market risk (including fair value and interest rate risks). The use of financial derivatives is governed by the municipalities approved by Council, which provide written principles on interest rate risk, credit risk, the use of financial derivatives financial derivatives financial instruments, and the investment of excess liquidity. The Municipality does not enter into or trade financial instruments, including derivative financial instruments, for speculative purposes.

#### 37.1 Market Risk

The municipality's activities expose it primarily to the financial risks of changes in interest rates. No formal policy exists to hedge volatilities in the interest rate market.

No formal policy exists to hedge volatilities in the interest rate market.

There has been no change to the municipality's exposure to market risks or the manner in which it manages and measures the risk.

37.1.1 Categories of Financial Instruments and Fair Value Estimation

Management considers the carrying amounts of financial assets and financial liabilities recorded at amortised cost in the financial statements to approximate their fair values on 30 June 2012, as a result of the short-term maturity of these assets and liabilities. In accordance with IAS 39.09 the financial assets and liabilities of the municipality are classified as follows:

30 June 2012	2012 Carrying Amount R	2011 Carrying Amount R	2010 Carrying Amount R
FINANCIAL ASSETS			
Investments and Receivables	18 847 942	46 911 466	123 451 479

Total Financial Instruments	( 89 139 678)	( 85 582 263)	8 532 933
Movement from previous year	-4.16%	-1102.96%	

#### 37.2 Interest Rate Risk Management

The municipality's policy is to manage interest rate risk so that fluctuations in variable rates do not have a material impact on the surplus/(deficit).

#### Interest Rate Sensitivity Analysis

The sensitivity analysis below was determined based on the exposure to interest rates at the reporting date. For variable rate long-term instruments, the analysis is prepared assuming the amount of the instrument outstanding at the reporting date was outstanding for the whole year. A 100 basis point increase or decrease was used, which represents management's assessment of the reasonably possible change in interest rates.

#### Effect of a change in interest rate on interest bearing financial assets and liabilities

Financial Assets	Classification	2012	2011
		R	R
External investments:			
Investments	Held to maturity	-	-

Effect of change in interest rate		4.50%	4.50%
Effect of change in interest rate		1801243	4 626 684
Effect of change in interest rate		6.50%	6.50%
Effect of change in interest rate		230 064	458 778

#### 37.3 Gearing Ratio

The municipality monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (including current and non current borrowings as shown in the balance sheet) less cash and cash equivalents plus net debt.

	2012 R	2011 R
The gearing ratio at the year-end was as follows:		
Debt	37 033 021	41 331 028
Net Debt	37 033 021	41 331 028
Equity	877 802 069	768 046 856
Net debt to equity ratio	4.22%	5.38%

Debt is defined as Long- and Short-term Liabilities.

Equity includes all Funds and Reserves of the municipality, disclosed as Net Assets in the Statement of Financial Position.

#### **41 GOING CONCERN**

The Sisonke District Municipality is currently facing financial challenges which is being addressed. The challenges are related to cash reserves, which has placed pressure on the Municipality liquidity ratio and financial sustainability.

Although certain strategies have already being implemented, which have showed positive results.

With regards to the strategies, the following financial measures have been implemented:

- 1. Re-scheduling of the 2012/2013 capital budget and outer two (2) year Medium-Term Revenue and Expenditure Framework.
- 2. Re assessing of the funding of the 2012/2013 capital budget and the outer two (2) year Medium-Term Revenue and Expenditure Framework.
- 3. Re prioritising projects and expenditure on the 2012/2013 operating budget and outer two (2) year Medium-Term Revenue and Expenditure Framework. 4. Re assess tariff of charges for the 2012/2013 Medium-Term Revenue and
- Expenditure Framework. 5. Profile debtors and implement and maintain strict credit control procedures.
- 6. Enhancing internal controls in Supply Chain Management. 7. Review Sisonke District Municipality organogram.
- 8. Enhanced budgetary controls

#### 42 RELATED PARTIES

Sisonke Development Agency:

A (shelf) PTY LTD was submitted to CIPRO for the establishment of an entity, it was registered in March 2011. The Agency as at 30 June 2012 had not appointed a CEO or a Board of Directors. No financial transactions have been recorded from the date of registration to 30 June 2012.

The acting CEO of the Sisonke Development Agency's contract is currently with Sisonke District Municipality and not the entity; therefore the relationship does not have any financial implications with regards to the registered PTY LTD.

#### SISONKE DISTRICT MUNICIPALITY APPENDIX A ACTUAL VERSES BUDGET (INCOME AND EXPENDITURE) for the year ended 30 June 2012

	2012	2012	2012		Explanation of Significant Variances greater than 10%
	Actual	Budget	Variance		
	R	R	R	%	
REVENUE					
Service charges	36 570 497	35 648 641	921 856	2.6%
